## How can I post to main text directly?

Posted by shinbasara - 2008/03/05 07:41

---

Hello! You did a nice job on movabletype API for joomla 1.0x. I can post blog to my joomla website directly from Zoundry now. Thanks a lot!

I have a question about this plugin. I noticed that when I post something from client, such as Zoundry. It goes directly to \"Intro text\", not \"main text\". Thus I can not post a lot in a single submission, since \"intro text\" only allows certain amount of words.

If you have any idea about this problem, please show me the way.

Best regards!

Thank you for use it.

Because I wrote explanation for the article, please look.
